

# Arc Tiny Homes Next Steps

Arc Design Tiny Homes offers a step-by-step plan that guides you through the tiny home project from start to finish.

<p><b>1. EXPLORE</b> Preliminary research price points of our tiny homes, available upgrades and design ideas by visiting our webpage.</p>	<p><b>Actions:</b> Consider and define as much as you can regarding your tiny home. Where will you park your home? What do you want your home to look like? Will you need to be off-grid? How will you finance your home?</p>
<p><b>2. CONNECT</b> We will discuss what is important for you in a tiny home and answer any questions not on our FAQ page.</p>	<p><b>Actions:</b> Once you've considered the above, write out any questions and concerns you may have, then contact our team.</p>
<p><b>3. VERIFY</b> Our team will provide tailored and personalised design ideas, alternations and upgrades to suit your interests and needs.</p>	<p><b>Actions:</b> Choose one of our tiny home models to start from, select upgrades and off-grid features and involve other important decision makers (family/friends) in the process.</p>
<p><b>4. PLAN</b> Once adjustments and upgrades have been confirmed, we will provide a quote and time frame for your build.</p>	<p><b>Actions:</b> Ensure you have a good understanding of the process, inclusions, time frame and budget.</p>
<p><b>5. SECURE</b> To secure your building slot, we will send you the building contract for you to sign and pay the 20% deposit.</p>	<p><b>Actions:</b> We will provide you with an invoice at this point. Transfer the deposit amount to proceed.</p>
<p><b>6. INDIVIDUALISE</b> Our team will discuss and confirm fittings and fixtures to personalise your home, including cabinetry, flooring and tapware more.</p>	<p><b>Actions:</b> Confirm any features and finishes as well as any further upgrades that you would like to personalise your home.</p>
<p><b>7. CONSTRUCT</b> At this point, once fixtures and fittings have been confirmed, we will begin construction.</p>	<p><b>Actions:</b> Make appointments to visit our warehouse to see the progression of your build at key intervals. Otherwise, we will keep you posted with photos and videos.</p>
<p><b>8. DELIVER</b> We will arrange transport and provide you with a 'Maintenance and Warranty Guide' that provides all relevant information to caring for your home.</p>	<p><b>Actions:</b> Ensure the home is ready for delivery; confirm the parking site is prepared and levelled.</p>
